SUMMARY

As a Frontend Developer, I bring a deep understanding of modern frameworks like React and Next.js, backed by extensive experience in creating user-centric interfaces with Mantine, Redux, and Tailwind CSS. My focus on seamless API integration, secure session management, and robust form validation has enabled me to deliver high-performance web applications. With a solid foundation in unit testing, state management, and data visualization, I am dedicated to building responsive, interactive, and scalable web solutions that enhance the user experience.

WORK EXPERIENCE

React Developer,UX-Qode   **Mar 2024 - Present**
Location type:Hybrid
Projects:Account Management System(AMS),Capital Engine, Template Libarary.

- Utilized Mantine's core, modals, notifications, and form libraries to create intuitive and responsive user interfaces.
- Implemented form validation and data manipulation using Yup and React Query, enhancing data integrity and user experience.
- Leveraged Axios for seamless REST API interactions and integrated JWT authentication for secure user sessions.
- Employed libraries like export-to-csv and xlsx for data export functionality, along with react-to-pdf for PDF generation.

React Developer,Code Rush (Project Based)   **Dec 2023 - Feb 2024**
Location type:On-Site
Projects:Learning Management Sysytem (LMS).

- A customizable React component library offering a wide range of UI components for modern web applications.
- A versatile table component that supports sorting, pagination, and customizable columns for efficient data presentation.
- Easily integrate libraries like Chart.js or Recharts for visualizing data with various chart types in your Mantine-based projects.

Software Engineer,Softosys   **Nov 2022 - Nov 2023**
Location type:Hybrid
Projects: Company Portfolio(Softosys), Matrimony Site(MyMatchHub), Helper FInder(helperprofiles).

- Write reliable code with Jest unit tests and use Postman to efficiently test and debug APIs, while enhancing API communication and usability with Swagger documentation.
- Simplify state management using Redux Toolkit and streamline form handling through React Hook Form for better performance and user experience.
- Build fast, scalable applications with Next.js and responsive, modern designs using Tailwind CSS, managing projects and team tasks effectively with Jira.

React(Intern),Meraki Techs   **Oct 2021 - Apr 2022**
Location type:On-Site
Projects: Inventory Management, Ecommerce Site, Restaurant Site,To-Do App.

- Manage global state seamlessly with Redux.js, emphasizing reducers and middleware for side effects.
- Implement real-time data synchronization and authentication using Firebase, leveraging its Firestore and Authentication services.
- Utilize Git for version control, ensuring collaborative workflows and maintaining a clean project history.
- Develop interactive UIs with React.js, prioritizing functional components and hooks for optimal performance and code reusability.

EDUCATION

Bachelor of Science in Computer Science and Information   **2018 - 2022**
Technology (BSc. CSIT)
Far-Western University
completed with First Class

ADDITIONAL INFORMATION

- **Languages:** Nepali, English, Hindi.
